

# Energy Policy Statement

## 1. APPLICATION

This policy is applicable to all Horizon Utilities Corporation's ("Horizon Utilities") permanent, contract and/or temporary employees, contractors and subcontractors ("workers") working on behalf of the company, when conducting services for Horizon Utilities and its affiliates.

## 2. PURPOSE

- Establish protocols, processes and systems necessary to improve energy performance at Horizon Utilities properties
- Develop and implement necessary improvements to reduce greenhouse gas emissions generated from Horizon Utilities properties
- Minimize the impact on the environment and energy costs
- Ensure compliance to all applicable legislation, regulations and guidelines
- Promote sustainability through energy conservation and renewable energy technologies; and
- Educate and empower employees accountable for energy conservation measures as it relates to Horizon Utilities properties

## 3. POLICY STATEMENT

Horizon Utilities is committed to achieving continual improvement of its energy performance, including energy efficiency, energy security, energy use and consumption, by maintaining and continually seeking to improve an energy management system whose goal is to reduce its energy use, cost of energy and greenhouse gas emissions.

Horizon Utilities will utilize a Plan-Do-Check-Act framework to implement reliable, cost-effective and innovative energy solutions designed to improve energy performance and conservation at all Horizon Utilities owned properties in a manner that provides a safe and comfortable environment for all its employees through the following measures:

- Complying with applicable regulations including other requirements subscribed to by Horizon Utilities related to our energy use, consumption and efficiency;
- Establishing and adhering to performance targets and programs for energy conservation and efficiency including their periodic review;
- Making energy conservation an integral part of our planning and operating decisions by informing, training and making all employees accountable for energy conservation;
- Supporting the purchase of energy efficient products and services wherever possible including the design for energy performance improvement throughout our operations; and

- Ensuring the availability of information and of necessary resources to achieve objectives and targets.
